## RP SOF Spartan Run-Flat Tires

The perfect tire for hunters, ranchers, government agencies, oil fields, pipeline and power line companies around the world! If austere terrain creates mobility challenges, then this is the tire solution for your SXS UTV vehicle.

- This aggressive, military derived UTV Tire is ultra-durable and made to last
- The reinforced hybrid construction sidewall allows the tire to maintain its rigidity and run without air for a limited distance at payload.
- 12-PLY Run-Flat increases operational survivability
- 1100+ lb load rating at maximum PSI with a 550 lb load rating, devoid of air
- Universal sizes, a true 24-, 25-, 26-, 27- and 29-inch tires (at max. operation pressure on a standard 6/7" wide wheel)

## RP SOF Talon Run-Flat Tires

From pavement to unexplored territory, choosing the RP SOF Talon Series Run-Flat Tire means you're choosing minimal road noise, optimal traction, and the opportunity to drive your UTV anywhere. Through anything.

- Directional, self-cleaning, wear-resistant tread
- Optimal traction in a variety of conditions including mud, snow, hardpack, rock-covered and paved
- Smooth ride with minimal road noise
- Maximum wear/operational longevity
- Hybrid construction throughout, with a puncture and dent resistance sidewall
- DOT certified
- 1150+ lb load rating at max PSI with a 550 lb load, devoid of air

Smooth riding. Run-flat. Wear-resistant tread.

## RP DELTA FX Dune/Desert Tires

Engineered for high horsepower UTV and SXS vehicles. The staggered low profile paddle and centralized blade design allows for high flotation and movement on hard-packed surfaces with exceptional sand traction, while minimizing blade wear.

- Rugged 4-PLY rated nylon cord construction
- The staggered paddle low profile design enhances flotation, allows for better paddle hook-up, combined with the extra wide center rib makes this a unique desert/sand dunes tire
- Twenty-four tapered 5/8" reinforced paddles and center rib. Extra wide 5/8" center directional rib
- With the 27x10x14 up front and the wider 27x13x14 tires in the rear makes for a highly mobile and fast response vehicle
- Recommended wheel sizes are 7" to 10" / 14" dia.
